isava SHOP PRIMER B-TR Code: 0038 Previous revision: 21/12/2021 Version: 2 Revision: 17/11/2022 Date of printing: 17/11/2022 SECTION 6: ACCIDENTAL RELEASE MEASURES PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES: 6.1 Eliminate possible sources of ignition and when appropriate, ventilate the area. Do not smoke. Avoid direct contact with this product. Avoid breathing vapours. Keep people without protection in opposition to the wind direction. ENVIRONMENTAL PRECAUTIONS 6.2 Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations. METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP 6.3 Contain and mop up spills with non-combustible absorbent materials (earth, sand, vermiculite, diatomaceous earth, etc..). Keep the remains in a closed container. REFERENCE TO OTHER SECTIONS: 6.4 For contact information in case of emergency, see section 1. For information on safe handling, see section 7. For exposure controls and personal protection measures, see section 8. For waste disposal, follow the recommendations in section 13 SECTION 7: HANDLING AND STORAGE PRECAUTIONS FOR SAFE HANDLING: 7.1 Comply with the existing legislation on health and safety at work. General recommendations: Avoid any type of leakage or escape.Keep the container tightly closed. - Recommendations for the prevention of fire and explosion risks: Vapours are heavier than air, may spread along floors to a considerable distance, can form explosive mixtures with air and are able to reach distant ignition sources and flame up or explode Due to its flammability, this material should only be used in areas from which all naked lights and other sources of ignition have been excluded and away from other heat or electrical sources. Switch mobile phones off and do not smoke. If this product is used in an industrial installation, the zones with risc of explosion should be marked. Use instruments, systems and protective equipment adequate to the classification of zones, according to the health and safety at work laws, in accordance with Directive 2016/34/EU and 99/92/EC. Electrical equipment should be protected to the appropriate standard. No tools with a potential for sparks should be used.Elaborate the document "Protection against explosions". Flashpoint 30* °C CLP 2.6.4.3. Autoignition temperature: Not applicable. - Recommendations for the prevention of toxicological risks: Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8. - Recommendations for the prevention of environmental contamination: It is not considered a danger to the environment. In the case of accidental spillage, follow the instructions indicated in section 6. CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: 7.2 Forbid the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10. Class of store: According to current legislation. Maximum storage period: 6 Months - Temperature interval: min:5 °C, max:40 °C (recommended). Observations: min:5 °C, max:40 °C (recommended). Incompatible materials: Keep away from acids, alkalis, oxidizing agents, amines. Type of packaging: According to current legislation. - Limit quantity (Seveso III): Directive 2012/18/EU: - Named dangerous substances/mixtures:None - Hazard categories and lower-/upperthreshold quantities in tonnes (t): · Physical hazards:Flammable liquid and vapour. (P5c) (5000t/50000t). · Health hazards:Not applicable Environmental hazards: Toxic to aquatic life with long lasting effects. (E2) (200t/500t). · Other hazards:Not applicable - Threshold quantity for the application of lower-tier requirements:200 tons - Threshold quantity for the application of upper-tier requirements:500 tons - Remarks: The gualifying guantities set out above relate to each establishment. The guantities to be considered for the application of the relevant Articles are the maximum quantities which are present or are likely to be present at any one time. Dangerous substances present at an establishment only in quantities equal to or less than 2 % of the relevant qualifying quantity shall be ignored for the purposes of calculating the total quantity present, if their location within an establishment is such that it cannot act as an initiator of a major accident elsewhere at that establishment. For more details, see note 4 of Annex I of the Seveso Directive.

1-methoxy-2-propanol	-	5.49	
Trizinc bis(orthophosphate)	-	35.6	n/t

n/b - PNEC not derived (not bioaccumulative potential).

8.2

EXPOSURE CONTROLS: ENGINEERING MEASURES:

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of particulates and vapours below the Occupational Exposure Limits, suitable respiratory protection must be worn.

Protection of respiratory system:

Avoid the inhalation of vapours.

- Protection of eyes and face:

Install water taps, sources or eyewash bottles with clean water close to the working area.

Protection of hands and skin:

It is recommended to install water taps or sources with clean water close to the working area.Barrier creams may help to protect the exposed areas of the skin.Barrier creams should not be applied once exposure has occurred.

OCCUPATIONAL EXPOSURE CONTROLS: REGULATION (EU) NO. 2016/425:

As a general measure on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE), with the corresponding marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, CEN norm, etc..), you should consult the informative brochures provided by the manufacturers of PPE.

Mask:	A-type filter mask (brown) for gases and vapours of organic compounds with a boiling point higher than 65°C (EN14387).Class 1: low capacity up to 1000 ppm, Class 2: medium capacity up to 5000 ppm, Class 3: high capacity up to 10000 ppm.In order to obtain a suitable protection level, the filter class must be selected depending on the type and concentration of the contaminating agents present, in accordance with the specifications supplied by the filter producers.The respiratory equipment with filters does not work satisfactorily when the air contains high concentrations of vapour or oxygen content less than 18% in volume.In presence of high concentrations of vapour, use independent breathing apparatus.
Safety goggles:	Safety goggles designed to protect against liquid splashes, with suitable lateral protection (EN166).Clean daily and disinfect at regular intervals in accordance with the instructions of the manufacturer.
Face shield:	No.
Gloves:	Gloves resistant against chemicals (EN374). When repeated or prolonged contact with the product is expected, gloves of protection level 5 or higher should be used, with a breakthrough time of >240 min. When short contact with the product is expected, use gloves with a protection level 2 or higher should be used, with a breakthrough time >30 min. The breakthrough time of the selected glove material should be in accordance with the pretended period of use. There are several factors (for example, temperature), they do in practice the period of use of a protective gloves resistant against chemicals is clearly lower than the established standard EN374. Due to the wide variety of circumstances and possibilities, the instructions/specifications provided by the glove supplier should be taken into account. Use the proper technique of removing gloves (without touching glove's outer surface) to avoid contact of the product with the skin. The gloves should be immediately replaced when any sign of degradation is noted.
Boots:	No.
Apron:	No.

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Aspiration hazard: Not classified	-		1 5	GHS/CLP 3.10.3.3.

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):

Effects	SE/RE	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Systemic effects:	RE	Systemic	Cat.2	HARMFUL: May cause damage to organs through prolonged or repeated exposure if inhaled.	GHS/CLP 3.8.3.4
 Respiratory effects: 	se 📢	Respiratory tract	Cat.3	IRRITANT: May cause respiratory irritation.	GHS/CLP 3.8.3.4
 Neurological effects: 	se	CNS	Cat.3	NARCOSIS: May cause drowsiness or dizziness if inhaled.	GHS/CLP 3.8.3.4.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

It is not considered as a mutagenic product.

Toxicity for reproduction:

Does not harm fertility.Does not harm the unborn child.

Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system.Liquid splashes in the eyes may cause irritation and reversible damage.If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Causes skin irritation. Causes serious eye damage. May cause respiratory irritation. May cause drowsiness or dizziness.

- Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. May cause damage to organs through prolonged or repeated exposure if inhaled.

INTERACTIVE EFFECTS:

Not available.

INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION:

- Dermal absorption:

This preparation contains the following substances for which dermal absorption can be very high: Xylene (mixture of isomers), Butan-1-ol, 1 -methoxy-2-propanol.

Basic toxicokinetics:

Not available.

ADDITIONAL INFORMATION:

	It contains low molecular weight epoxy constituents which are irritating to eyes, mucous membrane and skin.
11.2	INFORMATION ON OTHER HAZARDS:
	Endocrine disrupting properties:
	This product does not contain substances with endocrine disrupting properties identified or under evaluation.
	Other information:
	No additional information available.

SECTION						
	N 15: REGULATORY INFORMATION					
15.1	SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC FOR THE SUBSTANCE OR MIX The regulations applicable to this product generally are listed throughout this Safety Data Sheet.					
	Restrictions on manufacture, placing on market and use:					
	See section 1.2					
	Tactile warning of danger:					
	Not applicable (product for professional or industrial use).					
	Child safety protection:					
	Not applicable (the classification criteria are not met).					
	VOC information on the label:					
	Contains VOC max. 698,4 for the product ready for use - The limit value 2004/42/EC-IIB cat. C) Wash-primer. is VOC max. 780 g/l OTHER REGULATIONS:					
	Control of the risks inherent in major accidents (Seveso III):					
	See section 7.2					
	Other local legislations:					
	The receiver should verify the possible existence of local regulations applicable to the chemical.					
15.2	CHEMICAL SAFETY ASSESSMENT:					
	A chemical safety assessment has not been carried out for this mixture.					
SECTION	N 16 : OTHER INFORMATION					
16.1	TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3:					
	Hazard statements according the Regulation (EU) No. 1272/2008~2021/849 (CLP), Annex III:					
	H226 Flammable liquid and vapour. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H312 Harmful in contact with skin. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes					
	serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H400 Very					
	toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H373 May					
	cause damage to organs through prolonged or repeated exposure if inhaled.					
	Notes related to the identification, classification and labelling of the substances or mixtures: Note C : Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers. In this case the					
	supplier must state on the label whether the substance is a specific isomer or a mixture of isomers.					
	EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES:					
	See sections 9.1, 11.1 and 12.1.					
	ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS:					
	It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to provide understanding and interpretation of Safety Data Sheets and labelling of products as well.

	ABBREVIATIONS AND ACRONYMS:					
	List of abbreviations and acronyms that can be used (but not necessarily used) in this Safety Data Sheet:					
	· REACH: Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals.					
	· GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations.					
	 CLP: European regularion on Classificatin, Labelling amd Packaging of substances and chemical mixtures. EINECS: European Inventory of Existing Commercial Chemical Substances. 					
	· ELINCS: European List of Notified Chemical Substances.					
	CAS: Chemical Abstracts Service (Division of the American Chemical Society).					
	 · UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials. · SVHC: Substances of Very High Concern. 					
	· PBT: Persistent, bioaccumulable and toxic substances.					
	vPvB: Very persistent and very bioaccumulable substances.					
	· VOC: Volatile Organic Compounds. · DNEL: Derived No-Effect Level (REACH).					
	· PNEC: Predicted No-Effect Concentration (REACH).					
	LC50: Lethal concentration, 50 percent.					
	· LD50: Lethal dose, 50 percent. · UN: United Nations Organisation.					
	· ADR: European agreement concerning the international carriage of dangeous goods by road.					
	· RID: Regulations concerning the international transport of dangeous goods by rail.					
	· IMDG: International Maritime code for Dangerous Goods.					
	· IATA: International Air Transport Association. · ICAO: International Civil Aviation Organization.					
	SAFETY DATA SHEET REGULATIONS:					
	Safety Data Sheet in accordance with Article 31 of Regulation (EC) No. 1907/2006 (REACH) and Annex of Regulation (EU) No. 2020/878.
