SECTION	2 : HAZARDS IDEN							
2.1			HE SUBSTANCE OR MIXTURE					
	Classification of mixtures is carried out in accordance with the following principles: a) when data (tests) for the classification of mixtures are available, generally is carried out based on these data, b) in the absence of data (tests) for mixtures are generally used interpolation or extrapolation methods of assessing the risk, using the available data for mixtures similarly classified, and c) in the absence of tests and information which would allow to apply interpolation or extrapolation techniques, methods are used to classify risk assessment based on the data of the individual components in the mixture. Classification in accordance with Regulation (EU) No. 1272/2008~2021/849 (CLP):

 4: FIRST AID MEASURES

 4.1
 DESCRIPTION OF FIRST A

isaval

pintu

DESCRIPTION OF FIRST AID MEASURES: Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first

	Route of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures			
	Inhalation:	Inhalation of solvent vapours may produce headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.	Remove the patient out of the contaminated area into the fresh air. If breathing is irregular or stops, administer artificial respiration. If the person is unconscious, place appropriate recovery position. Keep the patient warm a at rest until medical attention arrives.			
	Skin:	Skin contact causes redness.Prolonged contact may cause skin dryness.	Remove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable sk cleanser.Do not use solvents or thinners.			
	Eyes:		Remove contact lenses.Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 1 minutes, holding the eyelids apart, until the irritation is reduced.Call a physician immediately.			
	Ingestion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.	If swallowed, seek medical advice immediately and sh container or label. Do not induce vomiting, due to the of aspiration.Keep the patient at rest.			
	MOST IMPORTANT SYMP	TOMS AND EFFECTS, BOTH ACUTE AND DE	LAYED:			
	The main symptoms and effects are indicated in sections 4.1 and 11.1					
	INDICATION OF ANY IMM	EDIATE MEDICAL ATTENTION AND SPECIAL	TREATMENT NEEDED:			
	Notes to physician:					
	Treatment should be directed	d at the control of symptoms and the clinical condition of the patient				
	Antidotes and contraindications:					
	Specific antidote not known.

SAFETY DATA SHEET (REACH)	
In accordance with Regulation (F	C) No. 1907/2006 and Regulation (EU) No. 2020/878	

Isalpox Multicapa Code : 12115

Version: 7

Revision: 14/09/2023

Previous revision: 16/12/2022

Date of printing: 14/09/2023

Ingestion: ATE > 5000 mg/kg bw Not classified	- Not classified as a product with acute toxicity GH if swallowed (based on available data, the classification criteria are not met).	IS/CLP .3.6.
--	---	-----------------

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

CORROSION / IRRITATION / SENSITISATION :

Danger class	Target organs	Cat.	at. Main effects, acute and/or delayed	
- Respiratory corrosion/irritation: Not classified	-	-	irritant by inhalation (based on available data	GHS/CLP 1.2.6. 3.8.3.4.
- Skin corrosion/irritation:	Skin	Cat.2	-	GHS/CLP 3.2.3.3.
- Serious eye damage/irritation:	Eyes 💿	Cat.2	······································	GHS/CLP 3.3.3.3.
- Respiratory sensitisation: Not classified	-	-	1 3 3	GHS/CLP 3.4.3.3.
- Skin sensitisation:	Skin	Cat.1	- ,	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Aspiration hazard: Not classified 	-		aspiration (based on available data, the	GHS/CLP 3.10.3.3.
			classification criteria are not met).	

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

<u>SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):</u> Not classified as a dangerous product for target organs.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

This preparation contains the following ingredients which can be mutagenic: 2,3-epoxypropyl neodecanoate (Cat.2)

- Toxicity for reproduction:

Does not harm fertility.Does not harm the unborn child.

- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:

Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system.Liquid splashes in the eyes may cause irritation and reversible damage.If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours.

- Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

INTERACTIVE EFFECTS:

Not available.

INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION:

- Dermal absorption:
