SECTION 4: FIRST AID MEASURES

4.1 DESCRIPTION OF FIRST AID MEASURES:

Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first aid.

	aid.		
	Route of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures
	Inhalation:	Inhalation of solvent vapours may produce headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.Inhalation produces irritation to mucus, coughing and breathlessness.	Remove the patient out of the contaminated area into the fresh air.If breathing is irregular or stops, administer artificial respiration.If the person is unconscious, place in appropriate recovery position.Keep the patient warm and at rest until medical attention arrives.
	Skin:	Skin contact causes redness.Prolonged contact may cause skin dryness.	Remove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser.Do not use solvents or thinners.
	Eyes:	Contact with the eyes produces redness and pain.	Remove contact lenses.Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is reduced.Call a physician immediately.
	Ingestion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.	If swallowed, seek medical advice immediately and show container or label. Do not induce vomiting, due to the risk of aspiration.Keep the patient at rest.
4.2		TOMS AND EFFECTS, BOTH ACUTE AND DE	LAYED:

6.1	6: ACCIDENTAL RELEASE MEASURES		
	PERSONAL PRECAUTIONS, PROTECTIVE EQU	IPMENT AND EMERGENCY PROCEDURES:	
	Eliminate possible sources of ignition and when approp	priate, ventilate the area. Do not smoke.Avoid direct contac	t with this product.Avoid
	breathing vapours.Keep people without protection in op	oposition to the wind direction.	
6.2	ENVIRONMENTAL PRECAUTIONS:		
		water and soil.In the case of large scale spills or when the	e product contaminates
	lakes, rivers or sewages, inform the appropriate author	•	
6.3	METHODS AND MATERIAL FOR CONTAINMEN	T AND CLEANING UP:	
		pent materials (earth, sand, vermiculite, diatomaceous ear	th, etc). Clean preferably
	with a biodegradable detergent. Keep the remains in a	closed container.	
6.4	REFERENCE TO OTHER SECTIONS:		
	For contact information in case of emergency, see sect	ion 1.	
	For information on safe handling, see section 7.		
	For exposure controls and personal protection measure		
	For waste disposal, follow the recommendations in sec	ction 13.	
ECTION	17: HANDLING AND STORAGE		
7.1	PRECAUTIONS FOR SAFE HANDLING:		
	Comply with the existing legislation on health and safe	ty at work.	
	- General recommendations:		
	Avoid any type of leakage or escape.Keep the contained	er tightly closed.	
	- Recommendations for the prevention of fire and	explosion risks:	
	Vapours are heavier than air, may spread along floors	to a considerable distance, can form explosive mixtures wi	th air and are able to read
		o its flammability, this material should only be used in areas	
		and away from other heat or electrical sources.Switch mo	bile phones off and do no
	smoke.No tools with a potential for sparks should be us	sed.	
ĺ	Flashpoint	26* °C (Pensky-Martens)	CLP 2.6.4.3.
	Autoignition temperature:	Not applicable.	
	Ventilation requirement:	Not available.	
Ì	- Recommendations for the prevention of toxicolog	jical risks:	
	Do not eat, drink or smoke while handling. After handling	g, wash hands with soap and water. For exposure controls	and personal protection
	measures, see section 8.		1 1
	- Recommendations for the prevention of environm	nental contamination:	
		case of accidental spillage, follow the instructions indicate	ed in section 6.
7.2	CONDITIONS FOR SAFE STORAGE, INCLUDIN		
	sources. Do not smoke in storage area. If possible, ave leakages, the containers, after use, should be closed of	reach of children. This product should be stored isolated fro bid direct contact with sunlight. Avoid extreme humidity con arefully and placed in a vertical position. For more informa	ditions. In order to avoid
	- Class of store:		
	According to current legislation.		
	- Maximum storage period:		
	12 Months.		
	- Temperature interval:		
	min:5 °C, max:40 °C (recommended).		
	 Incompatible materials: 		
	Keep away from oxidixing agents, from strongly alkalin	e and strongly acid materials.	
	- Type of packaging:		
	According to current legislation.		
	- Limit quantity (Seveso III): Directive 2012/18/EU:		
	Not applicable (product for non industrial use).

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 CONTROL PARAMETERS:

isava

Version: 6

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

- OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)

EH40/2005 WELs (United	Year	WEL-TWA		WEL-STEL		Remarks
Kingdom) 2018		ppm	mg/m3	ppm	mg/m3	
Xylene (mixture of isomers)	1996	100	434	150	651	BMGV, A4
2-methoxy-1-methylethyl acetate	-	50	275	100	550	Sk, Recommended
Hydrocarbons C9 aromatics	-	50	290	-	-	Recommended

WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min).

BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association with a guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned).

Sk - Can be absorbed through the skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.

A4 - Non classified as carcinogenic in humans.

- Dermal (Sk):

Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed.

- BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

- DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

- DERIVED NO-EFFECT LEVEL, WORKERS:- Systemic effects, acute and chronic:	DNEL Inhalation mg/m3		DNEL Cutaneous mg/kg bw/d			DNEL Oral mg/kg bw/d

8.2

EXPOSURE CONTROLS: ENGINEERING MEASURES:

◎ *	Lavapics	To
T		

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of particulates and vapours below the Occupational Exposure Limits, suitable respiratory protection must be worn.

- Protection of respiratory system:

Avoid the inhalation of vapours.

- Protection of eyes and face:

It is recommended to install water taps or sources with clean water close to the working area.

- Protection of hands and skin:

It is recommended to install water taps or sources with clean water close to the working area.Barrier creams may help to protect the exposed areas of the skin.Barrier creams should not be applied once exposure has occurred.

OCCUPATIONAL EXPOSURE CONTROLS: REGULATION (EU) NO. 2016/425:

As a general measure on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE), with the corresponding marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, CEN norm, etc..), you should consult the informative brochures provided by the manufacturers of PPE.

the manufacturers of F	
Mask:	A-type filter mask (brown) for gases and vapours of organic compounds with a boiling point higher thar 65°C (EN14387).Class 1: low capacity up to 1000 ppm, Class 2: medium capacity up to 5000 ppm, Class 3: high capacity up to 10000 ppm.In order to obtain a suitable protection level, the filter class must be selected depending on the type and concentration of the contaminating agents present, in accordance with the specifications supplied by the filter producers.The respiratory equipment with filters does not work satisfactorily when the air contains high concentrations of vapour or oxygen content less than 18% in volume.In presence of high concentrations of vapour, use independent breathing apparatus.
Safety goggles:	Safety goggles designed to protect against liquid splashes, with suitable lateral protection ✓ (EN166).Clean daily and disinfect at regular intervals in accordance with the instructions of the manufacturer.
Face shield:	No.
Gloves:	Gloves resistant against chemicals (EN374). When repeated or prolonged contact with the product is expected, gloves of protection level 5 or higher should be used, with a breakthrough time of >240 min. When short contact with the product is expected, use gloves with a protection level 2 or higher should be used, with a breakthrough time >30 min. The breakthrough time of the selected glove material should be in accordance with the pretended period of use. There are several factors (for example, temperature), they do in practice the period of use of a protective gloves resistant against chemicals is clearly lower than the established standard EN374. Due to the wide variety of circumstances and possibilities, the instructions/specifications provided by the glove supplier should be taken into account. Use the proper technique of removing gloves (without touching glove's outer surface) to avoid contact of the product with the skin. The gloves should be immediately replaced when any sign of degradation is noted.
Boots:	No.

SAFETY DATA SHEET (REACH) In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2020/878

(Language:EN) isava **DUEPOL_BARNIZ BRILLO 2 COMPONENTES** Code : 12121 Previous revision: 16/12/2022 Version: 6 Revision: 26/05/2023 Date of printing: 26/05/2023 *Estimated values based on the substances composing the mixture. **OTHER INFORMATION:** 9.2 Information regarding physical hazard classes Flammable liquids: Combustibility: Combustible. Other security features: VOC (supply): 46,7 % Weight VOC (supply): 461,1 g/l 53,29 * % Weight Nonvolatile: 1h. 60°C The values indicated do not always coincide with product specifications. The data for the product specifications can be found in the corresponding technical data sheet. For additional information concerning physical and chemical properties related to safety and environment, see sections 7 and 12. SECTION 10: STABILITY AND REACTIVITY 10.1 **REACTIVITY:** Corrosivity to metals: It is not corrosive to metals. Pyrophorical properties: It is not pyrophoric. CHEMICAL STABILITY: 10.2 Stable under recommended storage and handling conditions. POSSIBILITY OF HAZARDOUS REACTIONS: 10.3 Possible dangerous reaction with oxidizing agents, acids, metals. CONDITIONS TO AVOID: 10.4 - Heat: Keep away from sources of heat. Light: If possible, avoid direct contact with sunlight. - Air: The product is not affected by exposure to air, but should not be left the containers open. - Humidity: Avoid extreme humidity conditions. - Pressure: Not relevant. Shock: The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough handling to avoid dents and breakage of packaging, especially when the product is handled in large quantities, and during loading and download operations. **INCOMPATIBLE MATERIALS:** 10.5 Keep away from oxidixing agents, from strongly alkaline and strongly acid materials. HAZARDOUS DECOMPOSITION PRODUCTS: 10.6 As consequence of thermal decomposition, hazardous products may be produced: carbon monoxide.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

- Carcinogenic effects:

It is not considered as a carcinogenic product.

Genotoxicity:

It is not considered as a mutagenic product.

Toxicity for reproduction:

Does not harm fertility. Does not harm the unborn child.

Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system Liquid splashes in the eyes may cause irritation and reversible damage. If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Causes skin irritation. May cause respiratory irritation. May cause drowsiness or dizziness.

- Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. May cause damage to organs through prolonged or repeated exposure if inhaled.

INTERACTIVE EFFECTS:

Not available.

INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION:

- Dermal absorption:

This preparation contains the following substances for which dermal absorption can be very high: Xylene (mixture of isomers), 2-methoxy-1methylethyl acetate. - Basic toxicokinetics:

Not available.

ADDITIONAL INFORMATION:

Not available.

11.2

INFORMATION ON OTHER HAZARDS:

Endocrine disrupting properties:

This product does not contain substances with endocrine disrupting properties identified or under evaluation.

Other information: No additional information available.

(Language:EN) isava **DUEPOL BARNIZ BRILLO 2 COMPONENTES** Code : 12121 Previous revision: 16/12/2022 Version: 6 Revision: 26/05/2023 Date of printing: 26/05/2023 Not available - Earth global warming potential: In case of fire or incineration liberates CO2. SECTION 13: DISPOSAL CONSIDERATIONS WASTE TREATMENT METHODS: Directive 2008/98/EC~Regulation (EU) no. 1357/2014: 13.1 Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8. Disposal of empty containers:Directive 94/62/EC~2015/720/EU, Decision 2000/532/EC~2014/955/EU: Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same measures as for the product in itself. Procedures for neutralising or destroying the product: Controlled incineration in special facilities for chemical waste, in accordance with local regulations. SECTION 14: TRANSPORT INFORMATION UN NUMBER OR ID NUMBER: 14.1 1263 UN PROPER SHIPPING NAME: 14.2 PAINT TRANSPORT HAZARD CLASS(ES): 14.3 Transport by road (ADR 2023) and Transport by rail (RID 2023): Good not submitted to ADR. Transport for viscous liquids in packages with capacity under 450 L according to 2.2.3.1.5. (ADR) or under 30 L according to 2.3.2.5. (IMDG). Transport by sea (IMDG 40-20): - Class: 3 - Packing group: Ш - Emergency Sheet (EmS): F-E,S E - First Aid Guide (MFAG): 310.313 - Marine pollutant: No. - Transport document: Shipping Bill of lading. Transport by air (ICAO/IATA 2021): - Class: 3 - Packing group: Ш - Transport document: Air Bill of lading. Transport by inland waterways (ADN): Not available PACKING GROUP: 14.4 See section 14.3 **ENVIRONMENTAL HAZARDS:** 14.5 Not applicable (not classified as hazardous for the environment). SPECIAL PRECAUTIONS FOR USER: 14.6 Ensure that persons transporting the product know what to do in case of accident or spill. Always transport in closed containers that are upright and secure. Ensure adequate ventilation. MARITIME TRANSPORT IN BULK ACCORDING TO IMO INSTRUMENTS: 14.7 Not applicable.

isava **DUEPOL_BARNIZ BRILLO 2 COMPONENTES** Code : 12121 Previous revision: 16/12/2022 Version: 6 Revision: 26/05/2023 Date of printing: 26/05/2023 SECTION 15: REGULATORY INFORMATION SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC FOR THE SUBSTANCE OR MIXTURE 15.1 The regulations applicable to this product generally are listed throughout this Safety Data Sheet. Restrictions on manufacture, placing on market and use: See section 1.2 Tactile warning of danger: If the product is intended for the public in general, a tactile danger sign is mandatory. The technical specifications for tactile warning devices shall conform with EN ISO standard 11683 relating to 'Packaging - Tactile warnings of danger - Requirements.' Child safety protection: Not applicable (the classification criteria are not met). VOC information on the label: Contains VOC max. 474,9 g/l* for the product ready for use - The limit value 2004/42/EC-IIA cat. j) Two-pack performance coating, solventborne. is VOC max. 500 g/l (2010) OTHER REGULATIONS: Not available. Control of the risks inherent in major accidents (Seveso III): See section 7.2 Other local legislations: The receiver should verify the possible existence of local regulations applicable to the chemical. CHEMICAL SAFETY ASSESSMENT: 15.2 A chemical safety assessment has not been carried out for this mixture. SECTION 16 : OTHER INFORMATION TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3: 16.1 Hazard statements according the Regulation (EU) No. 1272/2008~2021/849 (CLP), Annex III: H226 Flammable liquid and vapour. H304 May be fatal if swallowed and enters airways. H312 Harmful in contact with skin. H315 Causes skin irritation. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H411 Toxic to aquatic life with long lasting effects. EUH066 Repeated exposure may cause skin dryness or cracking. H373 May cause damage to organs through prolonged or repeated exposure if inhaled. Notes related to the identification, classification and labelling of the substances or mixtures: Note C : Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers. In this case the supplier must state on the label whether the substance is a specific isomer or a mixture of isomers. EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES: See sections 9.1, 11.1 and 12.1. ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS: It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to provide understanding and interpretation of Safety Data Sheets and labelling of products as well. Changes since previous Safety Data Sheet:

Legislative, contextual, numerical, methodological and normative changes since the previous version of the present Safety Data Sheet are identified by #.

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users" working conditionsare beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product"s properties.
