SECTION 4: FIRST AID MEASURES

FIXACRIL_FIJADOR AL DISOLVENTE

Date of printing: 27/09/2023

when administering first

Version: 9

4.1

Revision: 27/09/2023

DESCRIPTION OF FIRST AID MEASURES:

Previous revision: 23/02/2023

Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection

Route of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures
Inhalation:	Inhalation of solvent vapours may produce headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.Inhalation produces irritation to mucus, coughing and breathlessness.	Remove the patient out of the contaminated area into th fresh air.If breathing is irregular or stops, administer artificial respiration.If the person is unconscious, place in appropriate recovery position.Keep the patient warm and at rest until medical attention arrives.
Skin:	Skin contact causes redness.Prolonged contact ma cause skin dryness.	Remove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or

		cause skin dryness.	thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser.Do not use solvents or thinners.				
	Eyes:	Contact with the eyes produces redness and pain.	Remove contact lenses.Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is reduced.Call a physician immediately.				
	Ingestion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.	If swallowed, seek medical advice immediately and show container or label. Do not induce vomiting, due to the risk of aspiration.Keep the patient at rest.				
4.2	MOST IMPORTANT SYMP	PTOMS AND EFFECTS, BOTH ACUTE AND DE	LAYED:				
	The main symptoms and effect	cts are indicated in sections 4.1 and 11.1					
4.3	INDICATION OF ANY IMM	EDIATE MEDICAL ATTENTION AND SPECIAL	TREATMENT NEEDED:				
	Notes to physician: Treatment should be directed at the control of symptoms and the clinical condition of the patient.						
	Antidotes and contraindications:						
	Specific antidote not known.						
SECTIO	N 5: FIREFIGHTING MEASURE	ES					
5.1	EXTINGUISHING MEDIA:)						
	Extinguishing powder or CO2						
5.2	SPECIAL HAZARDS ARIS	ING FROM THE SUBSTANCE OR MIXTURE:					
		on or thermal decomposition, hazardous products main ion or decomposition products may be a hazard to he					
5.3	ADVICE FOR FIREFIGHTE	ERS:					
	Special protective equipme	<u>ent:</u>					
		ire, heat-proof protective clothing may be required, ap sks and boots.If the fire-proof protective equipment is	ppropriate independent breathing apparatus, gloves, s not available or is not being used, combat fire from a				

sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents.

Other recommendations:

Cool with water the tanks, cisterns or containers close to sources of heat or fire.Bear in mind the direction of the wind.Do not allow firefighting residue to enter drains, sewers or water courses.

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guida included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may control of the same chemical of the same chemical.	- - - <u>DERIVED NO-EFFECT LEVEL (DNEL):</u> Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guida	bolites ir a iin quipmen ccumulat ances
recommended by a particular company, a government regulatory agency or an organization of experts. Pyrophorical properties: It is not pyrophoric. CHEMICAL STABILITY: 10.2 Stable under recommended storage and handling conditions. POSSIBILITY OF HAZARDOUS REACTIONS 10.3 Possible dangerous reaction with oxidizing agents, acids. CONDITIONS TO AVOID: 10.4 Heat: Keep away from sources of heat. Light: If possible, avoid direct contact with sunlight. Air: The product is not affected by exposure to air, but should not be left the containers open. Humidity Avoid extreme humidity conditions. Pressure: Not relevant. Shock: The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough handling to avoid dents and breakage of packaging, especially when the product is handled in large quantities, and during loading and download operations. 10.5 INCOMPATIBLE MATERIALS: Keep away from oxidixing agents, from strongly alkaline and strongly acid materials. HAZARDOUS DECOMPOSITION PRODUCTS: 10.6 As consequence of thermal decomposition, hazardous products may be produced: carbon monoxide. SECTION 11: TOXICOLOGICAL INFORMATION No experimental toxicological data on the preparation is available. The toxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008~2021/849 (CLP). INFORMATION ON HAZARD CLASSES AS DEFINED IN REGULATION (EC) NO 1272/2008 : 11.1 ACUTE TOXICITY: Dose and lethal concentrations DL50 (OECD401 DL50 (OECD402) CL50 (OECD403) mg/m3·4h Inhalation for individual ingredients: mg/kg bw Cutaneous mg/kg bw Ora > 22080 Rat Xylene (mixture of isomers) 4300 Rat 1700 Rabbit Toluene > 5000 Rat > 5000 Rabbit > 384 Rat Estimates of acute toxicity (ATE) ATF ATE ATF for individual ingredients: mg/m3·4h Inhalation mg/kg bw Ora mg/kg bw Cutaneous Xylene (mixture of isomers) 1700 11000 Vapours Toluene (*) - Point estimates of acute toxicity corresponding to the classification category (see GHS/CLP Table 3.1.2). These values are designed to be used in the calculation of the ATE for classification of a mixture based on its components and do not represent test results. (-) - The components that are assumed to have no acute toxicity at the upper threshold of category 4 for the corresponding exposure route are ignored. No observed adverse effect level NOAEL Ora NOAEL Cutaneous NOAEC Inhalation mg/kg bw/d mg/kg bw/d ma/m3 Toluene 625 Rat Lowest observed adverse effect level LOAEL Oral LOAEL Cutaneous LOAEC Inhalation mg/kg bw/c ma/ka bw/d 2261 Rat Toluene INFORMATION ON LIKELY ROUTES OF EXPOSURE: ACUTE TOXICITY: Routes of exposure Acute toxicity Cat. - Serious eye damage/irritation:	Eyes	Cat.2	IRRITANT: Causes serious eye irritation.	GHS/CLP 3.3.3.3.
 Respiratory sensitisation: Not classified 	-	-	Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.
- Skin sensitisation: Not classified	-	-	Not classified as a product sensitising by skir contact (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Aspiration hazard: Not classified	-		1 5	GHS/CLP 3.10.3.3.

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):

Effects	SE/RE	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Neurological:	RE	CNS	Cat.2	NEUROTOXIC: May cause damage to central nervous system through prolonged or repeated exposure if inhaled.	GHS/CLP 3.8.3.4
 Respiratory effects: 	se 📢	Respiratory tract	Cat.3	, , ,	GHS/CLP 3.8.3.4

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

Carcinogenic effects:

It is not considered as a carcinogenic product.

Genotoxicity:

It is not considered as a mutagenic product.

Toxicity for reproduction:

This preparation contains the following ingredients which can be toxic for human reproduction: Toluene (Cat.2)

Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system. Liquid splashes in the eyes may cause irritation and reversible damage. If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Causes skin irritation. Causes serious eye damage. May cause respiratory irritation.

- Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. May cause damage to central nervous system through prolonged or repeated exposure if inhaled.
