Revision: 14/12/2022

4.1 DESCRIPTION OF FIRST AID MEASURES:

Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first aid.

Rou	te of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures				
Inha	alation:	Inhalation of solvent vapours may produce	Remove the patient out of the contaminated area into				
		headache, dizziness, fatigue, muscular weakness,	fresh air. If breathing is irregular or stops, administer				
		drowsiness and, in extreme cases,	artificial respiration. If the person is unconscious, place				
	^	unconsciousness.	appropriate recovery position.Keep the patient warm				
	$\langle \rangle$		at rest until medical attention arrives.				
Skir	1:	Prolonged contact may cause skin dryness.	Remove immediately contaminated clothing.Wash				
			thoroughly the affected area with plenty of cold or				
			lukewarm water and neutral soap, or use a suitable s				
			cleanser.				
Eye	S:	Contact with the eyes produces redness and pain.	Remove contact lenses.Rinse eyes copiously by				
			irrigation with plenty of clean, fresh water for at least				
			minutes, holding the eyelids apart, until the irritation				
	- 4 ²		reduced.lf irritation persists, consult a physician.				
llinge	estion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and	If swallowed, seek immediate medical attention. Do				
		diarrhoea.	induce vomiting, due to the risk of aspiration.Keep th patient at rest.				
		PTOMS AND EFFECTS, BOTH ACUTE AND D

CTION 7: HANDLING AND STORAGE 1 PRECAUTIONS FOR SAFE HANDLING: Comply with the existing legislation on health and safety at work. - General recommendations: Avoid any type of leakage or escape. Keep the container tightly closed. - Recommendations for the prevention of fire and explosion risks: Vapours are heavier than air, may spread along floors to a considerable distance, can form explosive mixtures with air and are able to rec distant lightion sources and flame up or explode. Due to its flammability, this material should only be used in areas from which all naked lights and other sources of ignition have been excluded and away from other heat or electrical sources. Switch mobile phones off and do r smoke. No tools with a potential for sparks should be used. Flashpoint 37° °C CLP 2.6.4.3. Autoignition temperature: Not applicable. - Recommendations for the prevention of toxicological risks: Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8. - Recommendations for the prevention of environmental contamination: It is not considered a danger to the environment. In the case of accidental spillage, follow the instructions indicated in section 6. 2 CONDITIONS FOR SAFE STORAGE_INCLUDING ANY INCOMPATIBILITIES: Forbit the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. In order to avoic leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10. - Class of store; According to current legislation. - Innet quantity. (Se		For information on safe handling, see section 7.

Date of printing: 14/12/2022

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 CONTROL PARAMETERS:

isava

Version: 6

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

- OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)

- OCCOLATIONAL EXPOSITE LIMIT	VALUES					
EH40/2005 WELs (United	Year	WEL-TWA		WEL-STEL		Remarks
Kingdom) 2018		ppm	mg/m3	ppm	mg/m3	
Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics	-	-	300	-	1370	
Naphtha (petroleum), hydrotreated heavy	-	100	525	-	-	Recommended
1-methoxy-2-propanol	2013	50	184,3	100	368,6	A4
Xylene (mixture of isomers)	1996	100	434	150	651	BMGV, A4
Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics	-	184	1200	-	-	Recommended
Zirconium 2-ethylhexanoate	1996	-	5	-	10	

WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min). BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association with a guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned). A4 - Non classified as carcinogenic in humans.

- BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

- DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

I liealui, ule OLL values ale delived by a process diller						
- DERIVED NO-EFFECT LEVEL, WORKERS:- Systemic effects, acute and chronic:	DNEL Inhalation mg/m3		DNEL Cutaneous mg/kg bw/d		DNEL Oral mg/kg bw/d

ENGINEERING MEASURES:

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of particulates and vapours below the Occupational Exposure Limits, suitable respiratory protection must be worn.

- Protection of respiratory system:

Avoid the inhalation of vapours. Avoid the inhalation of dust.

- Protection of eyes and face:

It is recommended to install water taps or sources with clean water close to the working area.

- Protection of hands and skin:

Routes of exposure	Acute toxicity	Cat.	Main effects, acute and/or delayed	Criteria
Inhalation: Not classified	ATE > 20000 mg/m3	-	Not classified as a product with acute toxicity if inhaled (based on available data, the classification criteria are not met).	GHS/CL 3.1.3.6.
Skin: Not classified	ATE > 5000 mg/kg bw	-	Not classified as a product with acute toxicity in contact with skin (based on available data, the classification criteria are not met).	GHS/CL 3.1.3.6.
Eyes: Not classified	Not available.	-	Not classified as a product with acute toxicity by eye contact (lack of data).	GHS/CL 1.2.5.
Ingestion: Not classified	ATE > 5000 mg/kg bw	-	Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not met).	GHS/CLI 3.1.3.6.

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

CORROSION / IRRITATION / SENSITISATION :

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Respiratory corrosion/irritation Not classified 	-	-	Not classified as a product corrosive or irritant by inhalation (based on available data the classification criteria are not met).	GHS/CLP 1.2.6. 3.8.3.4.
- Skin corrosion/irritation: Not classified	-	-	Not classified as a product corrosive or irritant in contact with skin (based on available data, the classification criteria are not met).	GHS/CLP 3.2.3.3.
- Serious eye damage/irritation: Not classified	-	-	Not classified as a product corrosive or irritant in contact with eyes (based on available data, the classification criteria are not met).	GHS/CLP 3.3.3.3.
 Respiratory sensitisation: Not classified 	-	-	Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.
- Skin sensitisation: Not classified	-	-	Not classified as a product sensitising by skin contact (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Aspiration hazard: Not classified	-		······································	GHS/CLP 3.10.3.3.

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):

Effects	SE/RE	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Cutaneous:	RE	Skin		DEFATTENING: Repeated exposure may cause skin dryness or cracking.	GHS/CLP 1.2.4.
 Neurological effects: 	se 📢	CNS		NARCOSIS: May cause drowsiness or dizziness if inhaled.	GHS/CLP 3.8.3.4.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

Carcinogenic effects:

It is not considered as a carcinogenic product.

Genotoxicity:

It is not considered as a mutagenic product.

- Toxicity for reproduction:

Does not harm fertility.Does not harm the unborn child.

	Not readily biodegradable.						
	Aerobic biodegradation	COD	%DBO/DQO	Biodegradabilidad			
	for individual ingredients	mgO2/g	5 days 14 days 28 days				
	Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics	3500	10 52 80	Easy			
	Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics		10 52 80	Easy			
	Zirconium 2-ethylhexanoate		74	Easy			
	Naphtha (petroleum), hydrotreated heavy		77	Easy			
	Xylene (mixture of isomers)	2620	52 81 88	Easy			
	1-methoxy-2-propanol	1953	- 27 96	Easy			
	Note: Biodegradability data correspond to an avera <u>- Hydrolysis:</u> Not available. <u>- Photodegradability:</u> Not available.	ge of data from various bibliogra	aphic sources.				
2.3	BIOACCUMULATIVE POTENTIAL: May bioaccumulate.						
	Bioaccumulation for individual ingredients	logPow	BCF L/kg	Potentia			
	Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics	5.65	100 (calculated)	Low			
	Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics	5.65	100 (calculated)	Low			
	Zirconium 2-ethylhexanoate	1.9	8.3 (calculated)	No bioaccumulable			
	Naphtha (petroleum), hydrotreated heavy	5.65	100 (calculated)	Low			
	Xylene (mixture of isomers)	3.16	56.5 (calculated)	Low			
	1-methoxy-2-propanol	-0.49	3.2 (calculated)	No bioaccumulable			
2.4	MOBILITY IN SOIL: Not available		<u> </u>				
	Mobility	log Poc	Constant of Henry	Potentia			
	for individual ingredients	-	Pa⋅m3/mol 20ºC				
	Hydrocarbons, C10-C13, n-alkanes,	4,9	3,311 (calculated)	Low			
	isoalkanes, cyclics, <2% aromatics	1.0		1			
	Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics	4,9		Lov			
	Zirconium 2-ethylhexanoate	1,75		No bioaccumulable			
	Naphtha (petroleum), hydrotreated heavy	4,91		Low			
	Xylene (mixture of isomers)	2,25	660 (calculated)	Low			
	1-methoxy-2-propanol	2,25 0,15	0,0932 (calculated)	No bioaccumulable			
	RESULTS OF PBT AND VPVB ASSESMENT:						
2.5	Does not contain substances that fulfil the PBT/vPv	· · · · · · · · · · · · · · · · · · ·	<u>, 110. 1907/2000.)</u>				
2.6	ENDOCRINE DISRUPTING PROPERTIES:	D chiena.					
2.0	This product does not contain substances with end	ocrine disruptina properties ider	ntified or under evaluation				
2.7	OTHER ADVERSE EFFECTS:	r					
	- Ozone depletion potential:						
	Not available.						
	- Photochemical ozone creation potential:						
	Not available.						
	- Earth global warming potential:						
	In case of fire or incineration liberates CO2.						
CTION	13: DISPOSAL CONSIDERATIONS						
3.1	WASTE TREATMENT METHODS: Directive 20	08/98/EC~Regulation (EU) n	<u>o. 1357/2014:</u>				
	Take all necessary measures to prevent the produc Do not discharge into drains or the environment, dis accordance with current local and national regulation	spose at an authorised waste co	ollection point. Waste should b	e handled and disposed in			
	Disposal of empty containers:Directive 94/62/E	C~2015/720/EU, Decision 20	000/532/EC~2014/955/EU:				
	Emptied containers and packaging should be dispo packaging as hazardous waste will depend on the or classification, in accordance with Chapter 15 01 of contaminated containers and packaging, adopt the	degree of empting of the same, Decision 2000/532/EC, and forv	being the holder of the residue varding to the appropriate final	e responsible for their			
	containinated containers and packaging, adopt the	came medealee de lei ale pred					
	Procedures for neutralising or destroying the pr
