4.1

as Code : 12171 Revision: 14/12/2022

Previous revision: 24/02/2022

DESCRIPTION OF FIRST AID MEASURES: Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first aid.

	Route of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures						
	Inhalation:	Inhalation of solvent vapours may produce headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.	Remove the patient out of the contaminated area into the fresh air. If breathing is irregular or stops, administer artificial respiration. If the person is unconscious, place in appropriate recovery position. Keep the patient warm and at rest until medical attention arrives.						
	Skin:	cause skin dryness.	ayRemove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser.						
	Eyes:	Contact with the eyes produces redness and pain.	Remove contact lenses.Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is reduced.Call a physician immediately.						
	Ingestion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.	of aspiration.Keep the patient at rest.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 CONTROL PARAMETERS:

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

- OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)

		···/				
EH40/2005 WELs (United	Year	WEL-TWA		WEL-STEL		Remarks
Kingdom) 2018		ppm	mg/m3	ppm	mg/m3	
Xylene (mixture of isomers)	1996	100	434	150	651	BMGV, A4
Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics	-	-	300	-	1370	
1-methoxy-2-propanol	2013	50	184,3	100	368,6	A4

WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min). BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association with a guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned). A4 - Non classified as carcinogenic in humans.

- BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

- DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

health, the OEL values are derived by a process diff	DNEL Inhalation		DNEL Cutaneous			DNEL Oral

 SECTION 10: STABILITY AND REACTIVITY

 10.1
 REACTIVITY: - Corrosivity to metals: It is not corrosive to metals. - Pyrophorical properties: It is not pyrophoric.

	- Corrosivity to metals:									
	It is not corrosive to metals.									
	 Pyrophorical properties: 									
	It is not pyrophoric.									
10.2	CHEMICAL STABILITY:									
	Stable under recommended storage and handling conditions.									
10.3	POSSIBILITY OF HAZARDOUS REACTIONS:			-						
	Possible dangerous reaction with oxidizing agents,	acids, alkalis.								
10.4	CONDITIONS TO AVOID:									
	- Heat:									
	Keep away from sources of heat.									
	- Light:									
	If possible, avoid direct contact with sunlight.									
	- Air:									
	The product is not affected by exposure to air, but s	should not be left the containers	open.							
	- Humidity:									
	Avoid extreme humidity conditions.									
	- Pressure:									
	Not relevant.									
	- Shock:									
	The product is not sensitive to shocks, but as a rec	ommendation of a general natur	e should be avoided bumps a	nd rough handling to avoid						
	dents and breakage of packaging, especially when									
10.5	INCOMPATIBLE MATERIALS:									
	Keep away from oxidizing agents, acids, alkalis.									
10.6	HAZARDOUS DECOMPOSITION PRODUCTS:									
	As consequence of thermal decomposition, hazardous products may be produced: nitrogen oxides.									
SECTION	N 11: TOXICOLOGICAL INFORMATION									
•	No experimental toxicological data on the prepa	aration is available. The toxico	plogical classification for the	ese mixture has been						
	carried out by using the conventional calculatio	n method of the Regulation (E	EU) No. 1272/2008~2021/84	49 (CLP).						
11.1	INFORMATION ON HAZARD CLASSES AS D									
	ACUTE TOXICITY:	*								
	Dose and lethal concentrations	DL50 (OECD401)	DL50 (OECD402)	CL50 (OECD403)

Not classified as a product with acute toxicity GHS/CLP

	by eye contact (lack of data).
ATE > 5000 mg/kg bw	Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not met).

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

CORROSION / IRRITATION / SENSITISATION :

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Respiratory corrosion/irritation: Not classified 	-	-	irritant by inhalation (based on available data	GHS/CLP 1.2.6. 3.8.3.4.
- Skin corrosion/irritation:	Skin	Cat.2	IRRITANT: Causes skin irritation.	GHS/CLP 3.2.3.3.
- Serious eye damage/irritation:	Eyes	Cat.2	IRRITANT: Causes serious eye irritation.	GHS/CLP 3.3.3.3.
- Respiratory sensitisation: Not classified	-	-	1 3 3	GHS/CLP 3.4.3.3.
- Skin sensitisation:	Skin	Cat.1	- ,	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Aspiration hazard: Not classified 	-		1 3	GHS/CLP 3.10.3.3.
			classification criteria are not met).	

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):

Effe	cts SE/R	E Target organs	C	Cat.	Main effects, acute and/or delayed	Criteria
- Sy	rstemic effects: RE	Systemic	<u>}</u>		- , 5 5	GHS/CLP 3.8.3.4

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

Carcinogenic effects:

It is not considered as a carcinogenic product.

Genotoxicity:

It is not considered as a mutagenic product.

Toxicity for reproduction:

Does not harm fertility. Does not harm the unborn child.

Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system. Liquid splashes in the eyes may cause irritation and reversible damage. If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Causes skin irritation. May cause respiratory irritation. May cause drowsiness or dizziness.

Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. May cause damage to organs through prolonged or repeated exposure if inhaled.

Not available.

ASSESSMENT OF AQUATIC TOXICITY:

Aquatic toxicity	Cat.	Main hazards to the aquatic environment	Criteria
- Acute aquatic toxicity: Not classified	-	······································	GHS/CLP 4.1.3.5.5.3.
 Chronic aquatic toxicity: 	-	Not classified as a dangerous product with chronic toxicity to aquatic life with long lasting effects (based on available data, the classification criteria are not met).	GHS/CLP 4.1.3.5.5.4.

CLP 4.1.3.5.5.3: Classification of a mixture for acute hazards, based on summation of classified components.

CLP 4.1.3.5.5.4: Classification of a mixture for chronic (long term) hazards, based on summation of classified components.

12.2	PERSISTENCE AND DEGRADABILITY:						
	- Biodegradability:						
	Not readily biodegradable.						
	Aerobic biodegradation	COD	%DBO/DQO	Biodegradabilidad			
	for individual ingredients	mgO2/g	5 days 14 days 28 days				
	Propanediamine-dimeric C18 acids aduct		1	Not easy			
	Hydrocarbons, C9-C11, n-alkanes, isoalkanes,		10 52 80	Easy			
	cyclics, <2% aromatics						
	Xylene (mixture of isomers)	2620	52 81 88	Easy			
	1-methoxy-2-propanol	1953	- 27 96	Easy			
	Note: Biodegradability data correspond to an average of data from various bibliographic sources.						
	- Hydrolysis:						
	Not available.						
	- Photodegradability:						
	Not available.						
12.3	BIOACCUMULATIVE POTENTIAL:						
	May bioaccumulate.
