Previous revision: 30/11/2022

Date of printing: 24/04/2023

Version: 7

Revision: 24/04/2023 SECTION 4: FIRST AID MEASURES DESCRIPTION OF FIRST AID MEASURES: 4.1 Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure. Wear protective gloves when administering first aid. It can be dangerous to the person giving artificial respiration by mouth-to-mouth (the kiss of life). Symptoms and effects, acute and delayed Route of exposure Description of first-aid measures Inhalation: Inhalation of solvent vapours may produce Remove the patient out of the contaminated area into the headache, dizziness, fatigue, muscular weakness, fresh air. If breathing is irregular or stops, administer drowsiness and, in extreme cases, artificial respiration.If the person is unconscious, place in unconsciousness.Inhalation produces irritation to appropriate recovery position.Keep the patient warm and ()at rest until medical attention arrives. mucus, coughing and breathlessness. Skin contact causes redness.Prolonged contact may Remove immediately contaminated clothing.Wash Skin: cause skin drvness. thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin **<!**) cleanser. Contact with the eyes produces redness and pain. Remove contact lenses.Rinse eves copiously by Eyes: rrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is (!) reduced.Call a physician immediately. f swallowed, seek immediate medical attention. Do not Ingestion: f swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and induce vomiting, due to the risk of aspiration.Keep the diarrhoea. patient at rest. MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED: 4.2 The main symptoms and effects are indicated in sections 4.1 and 11.1 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED: 4.3 Notes to physician: The product inhaled during vomiting could cause lung damage. Thus, emesis should not be induced, neither mechanically nor pharmacologically. In the case of ingestion, empty the stomach with caution. Antidotes and contraindications: Specific antidote not known. In the case of a pneumonia by chemical agents, must be considered a therapy with antibiotics and corticosteroids SECTION 5: FIREFIGHTING MEASURES **EXTINGUISHING MEDIA:**) 5.1 Extinguishing powder or CO2 SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE 5.2 As consequence of combustion or thermal decomposition, hazardous products may be produced; carbon monoxide, Carbon dioxide.Exposure to combustion or decomposition products may be a hazard to health. 5.3 ADVICE FOR FIREFIGHTERS: Special protective equipment: Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents. Other recommendations: Cool with water the tanks, cisterns or containers close to sources of heat or fire.Bear in mind the direction of the wind.Do not allow firefighting residue to enter drains, sewers or water courses.

Previous revision: 30/11/2022 Version: 7 Revision: 24/04/2023 Date of printing: 24/04/2023 SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION CONTROL PARAMETERS 8.1 If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances. - OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL) EH40/2005 WELs (United WEL-TWA WEL-STEL Year Remarks Kingdom) 2018 mg/m3 ma/m3 maa ppm Xylene (mixture of isomers) 1996 100 434 150 651 BMGV, A4 290 Hydrocarbons C9 aromatics 50 Recommended WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min). BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association with a guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned). A4 - Non classified as carcinogenic in humans. - BIOLOGICAL LIMIT VALUES: Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity. This preparation contains the following substances that have established a biological limit value: - DERIVED NO-EFFECT LEVEL (DNEL): Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH. DNEL Inhalation DNEL Cutaneous DNEL Oral mg/kg bw/d - DERIVED NO-EFFECT LEVEL. WORKERS: Systemic effects, acute and chronic: - (a) 150 (c) - (a) 25 (c) - (a) - (c) Hydrocarbons C9 aromatics 289 (a) s/r (a) - (a) 77 (c) 180 (c) - (c) Xylene (mixture of isomers) DNEL Eyes DERIVED NO-EFFECT LEVEL, WORKERS:- Local DNEL Inhalation DNEL Cutaneous ma/cm2 effects, acute and chronic: (c) - (c) - (c) Hydrocarbons C9 aromatics - (a) - (a) - (a) -289 (a) s/r (c) s/r (a) s/r (c) - (a) - (c) Xylene (mixture of isomers) - DERIVED NO-EFFECT LEVEL, GENERAL DNEL Inhalation DNEL Cutaneous DNEL Eyes ma/m3 mg/kg bw/d mg/kg bw/d POPULATION:- Systemic effects, acute and chronic: - (a) 32 (c) - (a) 11 (c) - (a) 11 (C) Hydrocarbons C9 aromatics 174 (a) 14.8 (c) s/r (a) 108 (c) s/r (a) Xylene (mixture of isomers) 1,6 (C) **DNEL** Inhalation **DNEL** Cutaneous **DNEL Eyes** - LOCAL EFFECTS, ACUTE AND CHRONIC:- Local ma/cm2 ma/cm; effects, acute and chronic: - (a) - (c) - (a) - (c) - (a) - (c) Hydrocarbons C9 aromatics 174 (a) s/r (c) s/r (a) s/r (c) - (a) - (c) Xylene (mixture of isomers) (a) - Acute, short-term exposure, (c) - Chronic, long-term or repeated exposure. Pyrophorical properties: It is not pyrophoric. CHEMICAL STABILITY: 10.2 Stable under recommended storage and handling conditions. POSSIBILITY OF HAZARDOUS REACTIONS 10.3 Possible dangerous reaction with oxidizing agents, acids. CONDITIONS TO AVOID: 10.4 Heat: Keep away from sources of heat. Light: If possible, avoid direct contact with sunlight. Air: The product is not affected by exposure to air, but should not be left the containers open. Humidity Avoid extreme humidity conditions. Pressure: Not relevant. Shock: The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough handling to avoid dents and breakage of packaging, especially when the product is handled in large quantities, and during loading and download operations. INCOMPATIBLE MATERIALS 10.5 Keep away from oxidizing agents, acids, HAZARDOUS DECOMPOSITION PRODUCTS: 10.6 As consequence of thermal decomposition, hazardous products may be produced: carbon monoxide. SECTION 11: TOXICOLOGICAL INFORMATION No experimental toxicological data on the preparation is available. The toxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008~2021/849 (CLP). INFORMATION ON HAZARD CLASSES AS DEFINED IN REGULATION (EC) NO 1272/2008 : 11.1 ACUTE TOXICITY: Dose and lethal concentrations DL50 (OECD401 DL50 (OECD402) CL50 (OECD403) for individual ingredients: mg/kg bw Cutaneous mg/m3·4h Inhalation mg/kg bw Ora Hydrocarbons C9 aromatics 3592 Rat 3160 Rabbit > 6193 Rat Xylene (mixture of isomers) 4300 Rat 1700 Rabbit > 22080 Rat Estimates of acute toxicity (ATE) ATF ATE ATF for individual ingredients: mg/m3·4h Inhalation mg/kg bw Ora mg/kg bw Cutaneous Hydrocarbons C9 aromatics Xylene (mixture of isomers) *1700 11000 Vapours (*) - Point estimates of acute toxicity corresponding to the classification category (see GHS/CLP Table 3.1.2). These values are designed to be used in the calculation of the ATE for classification of a mixture based on its components and do not represent test results. (-) - The components that are assumed to have no acute toxicity at the upper threshold of category 4 for the corresponding exposure route are ignored. - No observed adverse effect level Not available - Lowest observed adverse effect level Not available INFORMATION ON LIKELY ROUTES OF EXPOSURE: ACUTE TOXICITY: Routes of exposure Acute toxicitv Cat. Main effects, acute and/or delaved Criteria GHS/CLF Inhalation: ATE : 16.513 mg/m3 Cat.4 HARMFUL: Harmful if inhaled. 3.1.3.6. $\langle ! \rangle$ Not classified as a product with acute toxicity Skin: ATE : 2.552 mg/kg bw GHS/CLP Not classified in contact with skin (based on available data, 3.1.3.6. the classification criteria are not met) Not available. Not classified as a product with acute toxicity GHS/CLP Eves: Not classified by eye contact (lack of data). 1.2.5. Ingestion: ATE > 2000 mg/kg bw Not Not classified as a product with acute toxicity GHS/CLP Not classified available. f swallowed (based on available data, the 3.1.3.6. classification criteria are not met).

CMR EFFECTS:

- Carcinogenic effects:
- It is not considered as a carcinogenic product.
- Genotoxicity:
- It is not considered as a mutagenic product.
- Toxicity for reproduction:
- Does not harm fertility.Does not harm the unborn child.
- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:

Routes of exposure

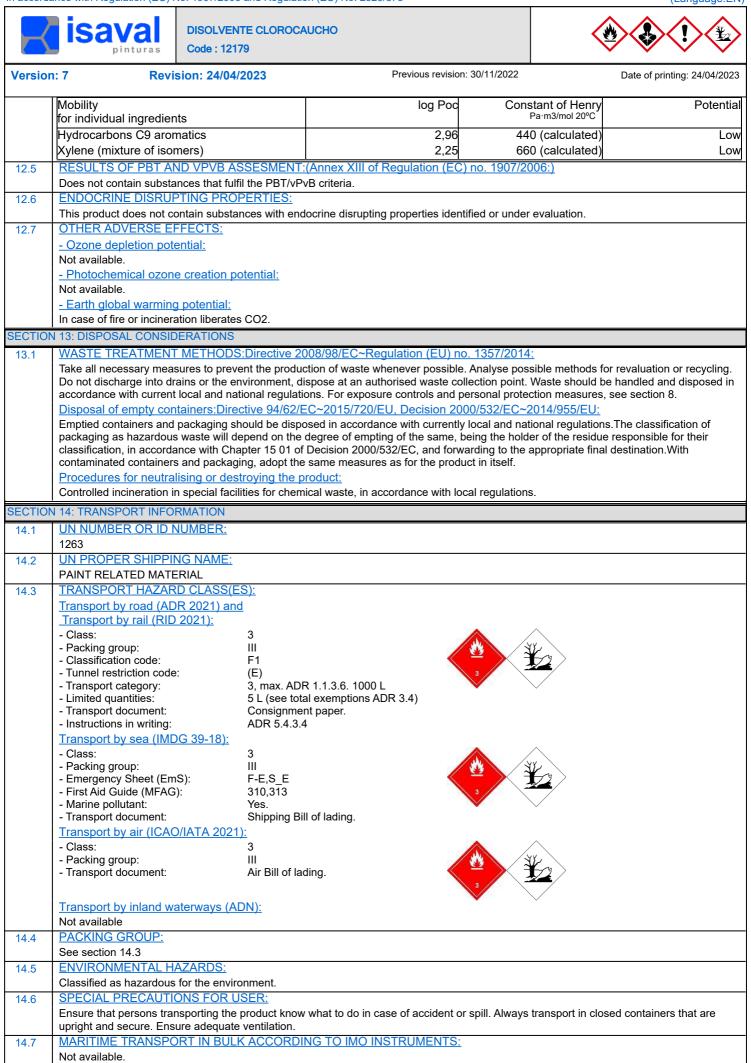

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system.Liquid splashes in the eyes may cause irritation and reversible damage.If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Causes skin irritation. Causes serious eye damage. May cause respiratory irritation. May cause drowsiness or dizziness.Very small amounts aspirated by the lungs may cause severe pulmonary damage, including death.

Changes since previous Safety Data Sheet:

Legislative, contextual, numerical, methodological and normative changes since the previous version of the present Safety Data Sheet are identified by #.

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users" working conditionsare beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product" sproperties.
