Date of issue: 03/11/2023

	N 5: FIREFIGHTING MEASURES
1	
	In case of fire in the surroundings, all extinguishing agents are allowed.
2	SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE:
	As consequence of combustion or thermal decomposition, hazardous products may be produced: carbon monoxide, Carbon dioxide, nitrogen oxides, sulfur oxides, halogenated compounds, hydrochloric acid.Exposure to combustion or decomposition products may be a hazard to health.
3	ADVICE FOR FIREFIGHTERS:
	Special protective equipment: Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents. Other recommendations:
	Cool with water the tanks, cisterns or containers close to sources of heat or fire.Bear in mind the direction of the wind.Do not allow fire- fighting residue to enter drains, sewers or water courses.
CTIC	N 6: ACCIDENTAL RELEASE MEASURES
1	PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:
	Avoid direct contact with this product.
2	ENVIRONMENTAL PRECAUTIONS: Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations.
3	METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP:
5	Contain and mop up spills with absorbent materials (sawdust, earth, sand, vermiculite, diatomaceous earth, etc). Keep the remains in a closed container.
4	REFERENCE TO OTHER SECTIONS:
	For contact information in case of emergency, see section 1. For information on safe handling, see section 7. For exposure controls and personal protection measures, see section 8. For waste disposal, follow the recommendations in section 13.
	N 7: HANDLING AND STORAGE
	PRECAUTIONS FOR SAFE HANDLING:
1	Comply with the existing legislation on health and safety at work. <u>- General recommendations:</u>
	Avoid any type of leakage or escape.Keep the container tightly closed. <u>- Recommendations for the prevention of fire and explosion risks:</u>
	The product is not liable to ignite, deflagrate or explode, and does not sustain the combustion reaction by oxygen from air in the environment in which it is, so it is not included in the scope of Directive 2014/34/EU concerning equipment and protective systems intend for use in potentially explosive atmospheres.
	- Recommendations for the prevention of toxicological risks:
	Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protectio measures, see section 8.
	- Recommendations for the prevention of environmental contamination:
	It is not considered a danger to the environment. In the case of accidental spillage, follow the instructions indicated in section 6.
2	CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: Forbid the entry to unauthorized persons. Keep out of reach of children. Keep away from sources of heat. If possible, avoid direct contact with sunlight. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10.
	- Class of store:
	According to current legislation.
	- Maximum storage period:
	12 Months.
	- Temperature interval:
	min:5 °C, max:40 °C (recommended).
	- Incompatible materials:
	Keep away from oxidizing agents, acids, alkalis.
	- Type of packaging:
	According to current legislation.
	- Limit quantity (Seveso III): Directive 2012/18/EU:
	Not applicable (product for non industrial use).
3	
3	Not applicable (product for non industrial use).

RHONA A-500 Code : 12227

Version: 1

Date of issue: 03/11/2023

Eyes: Not classified	Not available.	Not classified as a product with acute toxicity by eye contact (lack of data).	GHS/CLP 1.2.5.
Ingestion: Not classified	ATE > 5000 mg/kg bw	Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not met).	GHS/CLP 3.1.3.6.

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

CORROSION / IRRITATION / SENSITISATION :

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Respiratory corrosion/irritation: Not classified 	-	-	Not classified as a product corrosive or irritant by inhalation (based on available data the classification criteria are not met).	GHS/CLP ,1.2.6. 3.8.3.4.
- Skin corrosion/irritation: Not classified	-	-	Not classified as a product corrosive or irritant in contact with skin (based on available data, the classification criteria are not met).	GHS/CLP 3.2.3.3.
- Serious eye damage/irritation: Not classified		-	Not classified as a product corrosive or irritant in contact with eyes (based on available data, the classification criteria are not met).	GHS/CLP 3.3.3.3.
 Respiratory sensitisation: Not classified 	-	-	Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.
- Skin sensitisation: Not classified	-	-	Not classified as a product sensitising by skin contact (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Aspiration hazard: Not classified 	-	-	Not classified as a product hazardous by aspiration (based on available data. the	GHS/CLP 3.10.3.3.
Not classified			classification criteria are not met).	5.10.5.5.

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE): Not classified as a dangerous product for target organs.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

It is not considered as a mutagenic product.

- Toxicity for reproduction:

Does not harm fertility.Does not harm the unborn child.

- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure

Not available. <u>- Short-term exposure:</u> May irritate the eyes and skin. <u>- Long-term or repeated exposure:</u> Not available.

INTERACTIVE EFFECTS: Not available.

CTION	I 15: REGULATORY INFORMATION
5.1	SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC FOR THE SUBSTANCE OR MIXTUR
	The regulations applicable to this product generally are listed throughout this Safety Data Sheet.
	Restrictions on manufacture, placing on market and use:
	See section 1.2
	Tactile warning of danger:
	Not applicable (the classification criteria are not met).
	Child safety protection:
	Not applicable (the classification criteria are not met).
	OTHER REGULATIONS:
	Not available.
	Control of the risks inherent in major accidents (Seveso III):
	See section 7.2
	Other local legislations:
	The receiver should verify the possible existence of local regulations applicable to the chemical.
5.2	CHEMICAL SAFETY ASSESSMENT:
0.2	
	A chemical safety assessment has not been carried out for this mixture.
	I 16 : OTHER INFORMATION
5.1	TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3:
	Hazard statements according the Regulation (EU) No. 1272/2008~2021/849 (CLP), Annex III:
	H301 Toxic if swallowed. H302 Harmful if swallowed. H310 Fatal in contact with skin. H314 Causes severe skin burns and eye damage.
	H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H330 Fatal if inhaled. H400 V
	toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. EUH071 Corrosive to the respiratory tract.
	Notes related to the identification, classification and labelling of the substances or mixtures:
	Note B : Some substances (acids, bases, etc.) are placed on the market in aqueous solutions at various concentrations and, therefore,
	these solutions require different classification and labelling since the hazards vary at different concentrations. In Part 3 entries with Note
	have a general designation of the following type: 'nitric acid %'. In this case the supplier must state the percentage concentration of th
	solution on the label. Unless otherwise stated, it is assumed that the percentage concentration is calculated on a weight/weight basis.
	EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES:
	See sections 9.1, 11.1 and 12.1.
	ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS:
	It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to
	provide understanding and interpretation of Safety Data Sheets and labelling of products as well.

GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations. CLP: European regularion on Classificatin, Labelling amd Packaging of substances and chemical mixtures. EINECS: European Inventory of Existing Commercial Chemical Substances. CAS: Chemical Abstracts Service (Division of the American Chemical Society). UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials. SVHC: Substances of Very High Concern. PBT: Persistent, bioaccumulable and toxic substances. VPVB: Very persistent and very bioaccumulable substances. DNEL: Derived No-Effect Level (REACH). PNEC: Predicted No-Effect Concentration (REACH). LC50: Lethal concentration, 50 percent. UN: United Nations Organisation. ADR: European agreement concerning the international carriage of dangeous goods by road. RID: Regulations concerning the international transport of dangeous goods by rail.
	 REACH: Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals. GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations. CLP: European regularion on Classificatin, Labelling and Packaging of substances and chemical mixtures. EINECS: European Inventory of Existing Commercial Chemical Substances. ELINCS: European List of Notified Chemical Substances. CAS: Chemical Abstracts Service (Division of the American Chemical Society). UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials. SVHC: Substances of Very High Concern. PBT: Persistent, bioaccumulable and toxic substances. VPVB: Very persistent and very bioaccumulable substances. DNEL: Derived No-Effect Level (REACH). PNEC: Predicted No-Effect Concentration (REACH). LC50: Lethal concentration, 50 percent. LD50: Lethal dose, 50 percent. UN: United Nations Organisation. ADR: European agreement concerning the international carriage of dangeous goods by road. RID: Regulations concerning the international transport of dangeous goods by rail. IMDG: International Maritime code for Dangerous Goods.
	 REACH: Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals. GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations. CLP: European regularion on Classificatin, Labelling amd Packaging of substances and chemical mixtures. EINECS: European Inventory of Existing Commercial Chemical Substances. CLS: European List of Notified Chemical Substances. CAS: Chemical Abstracts Service (Division of the American Chemical Society). UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials. SVHC: Substances of Very High Concern. PBT: Persistent, bioaccumulable and toxic substances. vPvB: Very persistent and very bioaccumulable substances. DNEL: Derived No-Effect Level (REACH). PNEC: Predicted No-Effect Concentration (REACH). LC50: Lethal concentration, 50 percent. LD50: Lethal dose, 50 percent. UN: United Nations Organisation. ADR: European agreement concerning the international carriage of dangeous goods by road. RID: Regulations concerning the international transport of dangeous goods by rail. IMDG: International Maritime code for Dangerous Goods. IATA: International Air Transport Association.
