SECTION	4: FIRST AID MEASURES
4.1	DESCRIPTION OF FIRST AID M

CRIPTION OF FIRST AID MEASURES: Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first

aid.		
Route of exposure	e Symptoms and effects, acute and delayed	Description of first-aid measures
Inhalation:	It is not expected that symptoms will occur un normal conditions of use.	nder Remove the patient out of the contaminated area into the fresh air.If breathing is irregular or stops, administer artificial respiration.If the person is unconscious, place ir appropriate recovery position.Keep the patient warm and at rest until medical attention arrives.
Skin:	Skin contact causes redness.	Remove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser.
Eyes:	Contact with the eyes may produce slight redr	irrigation with plenty of clean, fresh water, holding the eyelids apart. If irritation persists, consult a physician.
Ingestion:	lf swallowed, may cause gastrointestinal disturbances.	If swallowed, seek medical advice immediately and show container or label. Do not induce vomiting, due to the ris of aspiration.Keep the patient at rest.
MOST IMPORT	ANT SYMPTOMS AND EFFECTS, BOTH ACUTE AN	ND DELAYED:
	ms and effects are indicated in sections 4.1 and 11.1	
INDICATION OF	FANY IMMEDIATE MEDICAL ATTENTION AND SPE	ECIAL TREATMENT NEEDED:
Notes to physici		
	be directed at the control of symptoms and the clinical cor	ndition of the patient
Antidotes and co		
Specific antidote		
FION 5: FIREFIGHTING		
EXTINGUISHIN		
	he surroundings, all extinguishing agents are allowed.	
	RDS ARISING FROM THE SUBSTANCE OR MIXTU	
	of combustion or thermal decomposition, hazardous produ ulfur oxides, halogenated compounds, hydrochloric acid.E	icts may be produced: carbon monoxide, Carbon dioxide, Exposure to combustion or decomposition products may be a
ADVICE FOR F	REFIGHTERS:	
Special protectiv	<u>/e equipment:</u>	
Depending on ma	anitude of fire heat-proof protective clothing may be requi	ired, appropriate independent breathing apparatus, gloves

Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents.

Other recommendations:

Cool with water the tanks, cisterns or containers close to sources of heat or fire.Bear in mind the direction of the wind.Do not allow firefighting residue to enter drains, sewers or water courses.

#### Version: 18 Revision: 26/01/2023 SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION CONTROL PARAMETERS 8.1 If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances. OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL) Not established - BIOLOGICAL LIMIT VALUES: Not established - DERIVED NO-EFFECT LEVEL (DNEL): Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH. Inhalation: Not classified	ATE > 20000 mg/m3	-	Not classified as a product with acute toxicity GH if inhaled (based on available data, the 3.1 classification criteria are not met).	HS/CLP 1.3.6.
Skin: Not classified	ATE > 5000 mg/kg bw	-	Not classified as a product with acute toxicity GH in contact with skin (based on available data, 3.1 the classification criteria are not met).	
Eyes: Not classified	Not available.	-	Not classified as a product with acute toxicity GH by eye contact (lack of data).	HS/CLP 2.5.
Ingestion: Not classified	ATE > 5000 mg/kg bw	-	Not classified as a product with acute toxicity GH if swallowed (based on available data, the classification criteria are not met).	HS/CLP 1.3.6.

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

#### CORROSION / IRRITATION / SENSITISATION :

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Respiratory corrosion/irritation: Not classified	-	-	Not classified as a product corrosive or irritant by inhalation (based on available data the classification criteria are not met).	GHS/CLP ,1.2.6. 3.8.3.4.
- Skin corrosion/irritation: Not classified	-	-	Not classified as a product corrosive or irritant in contact with skin (based on available data, the classification criteria are not met).	GHS/CLP 3.2.3.3.
- Serious eye damage/irritation: Not classified	-	-	Not classified as a product corrosive or irritant in contact with eyes (based on available data, the classification criteria are not met).	GHS/CLP 3.3.3.3.
- Respiratory sensitisation: Not classified	-	-	Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.
- Skin sensitisation: Not classified	-	-	Not classified as a product sensitising by skir contact (based on available data, the classification criteria are not met).	GHS/CLP 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

#### - ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
- Aspiration hazard: Not classified	-		1 3	GHS/CLP 3.10.3.3.

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

<u>SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):</u> Not classified as a dangerous product for target organs.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS: - Carcinogenic effects: It is not considered as a carcinogenic product. - Genotoxicity: It is not considered as a mutagenic product. - Toxicity for reproduction: Does not harm fertility.Does not harm the unborn child. - Effects via lactation: Not classified as a hazardous product for children breast-fed. DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure Not available. - Short-term exposure:

	N 13: DISPOSAL CONSIDERATIONS							
13.1	WASTE TREATMENT METHODS:Directive 2008/98/EC~Regulation (EU) no. 1357/2014: Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling.							
	Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in							
	accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8.							
	Disposal of empty containers:Directive 94/62/EC~2015/720/EU, Decision 2000/532/EC~2014/955/EU: Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of							
	packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their							
	classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same measures as for the product in itself.							
	Procedures for neutralising or destroying the product:							
	Authorised landfill in accordance with local regulations.

#### SECTION 16 : OTHER INFORMATION

Version: 18

isaval

pinturas

SECTION	TO . OTHER INFORMATION
16.1	TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3:
	Hazard statements according the Regulation (EU) No. 1272/2008~2021/849 (CLP), Annex III:
	H301 Toxic if swallowed. H302 Harmful if swallowed. H310 Fatal in contact with skin. H311 Toxic in contact with skin. H314 Causes severe
	skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage.
	H330 Fatal if inhaled. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects. EUH071 Corrosive to the respiratory tract.
	Notes related to the identification, classification and labelling of the substances or mixtures:
	Note B : Some substances (acids, bases, etc.) are placed on the market in aqueous solutions at various concentrations and, therefore,
	these solutions require different classification and labelling since the hazards vary at different concentrations. In Part 3 entries with Note B
	have a general designation of the following type: 'nitric acid %'. In this case the supplier must state the percentage concentration of the
	solution on the label. Unless otherwise stated, it is assumed that the percentage concentration is calculated on a weight/weight basis.
	EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES:
	See sections 9.1, 11.1 and 12.1.
	OBSERVATIONS:
	Non-skin sensitizing based on the results of similar mixtures tested in accordance with the bridging principles described in art.9, par.4, Reg.CLP;OECD 429LLNA(mouse)-non-skin sensitizing–S4565;S4568 ;S5146;S5147
	ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS:
	It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to
	provide understanding and interpretation of Safety Data Sheets and labelling of products as well.
