Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances. - OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL) Not established - BIOLOGICAL LIMIT VALUES: Not established - DERIVED NO-EFFECT LEVEL (DNEL): Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of particles below the Occupational Exposure

- Protection of respiratory system:

Not applicable.

- Protection of eyes and face:

It is recommended to install water taps or sources with clean water close to the working area.

- Protection of hands and skin:

It is recommended to install water taps or sources with clean water close to the working area.Barrier creams may help to protect the exposed areas of the skin.Barrier creams should not be applied once exposure has occurred.

OCCUPATIONAL EXPOSURE CONTROLS: REGULATION (EU) NO. 2016/425:

As a general measure on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE), with the corresponding marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, CEN norm, etc..), you should consult the informative brochures provided by the manufacturers of PPE.

Limits, suitable respiratory protection must be worn.

Mask:	Suitable respiratory protection at low concentrations or short-term incidence:P1-type filter mask (white), with low retention ability, for inert solid particles (EN143), Inward leakage: 22%, Assigned protection factor: up to 4 times TLV.In order to obtain a suitable protection level, the filter class must be selected depending on the type and concentration of the contaminating agents present, in accordance with the specifications supplied by the filter producers.Particle filters must be disposed when you notice an increase in breathing resistance.
Safety goggles:	Safety goggles with suitable lateral protection (EN166).Clean daily and disinfect at regular intervals in \prime accordance with the instructions of the manufacturer.
Face shield:	No.

CMR EFFECTS:

- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

It is not considered as a mutagenic product.

- Toxicity for reproduction:

Does not harm fertility.Does not harm the unborn child.

- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE: Routes of exposure

Not available.

- Short-term exposure:

Causes burns to the skin or eyes by direct contact or to the digestive tract if swallowed. The mists of fine particles are skin and respiratory tract irritants. Causes serious eye damage. Causes skin irritation. Causes serious eye damage. May cause drowsiness or dizziness. - Long-term or repeated exposure:

Criteria Acute aquatic toxicity: Not classified as a hazardous product with acute toxicity to aquatic life GHS/CLP Not classified (based on available data, the classification criteria are not met). 4.1.3.5.5.3. Not classified as a dangerous product with chronic toxicity to aquatic life Chronic aquatic toxicity: GHS/CLP with long lasting effects (based on available data, the classification criteria 4.1.3.5.5.4. are not met). CLP 4.1.3.5.5.3: Classification of a mixture for acute hazards, based on summation of classified components. CLP 4.1.3.5.5.4: Classification of a mixture for chronic (long term) hazards, based on summation of classified components. PERSISTENCE AND DEGRADABILITY: 12.2 - Biodegradability: Not available. - Hydrolysis: Not available. - Photodegradability: Not available. **BIOACCUMULATIVE POTENTIAL:** 12.3 Not available. Bioaccumulation logPow BCF Potential L/kg for individual ingredients 12.4 MOBILITY IN SOIL: Not available RESULTS OF PBT AND VPVB ASSESMENT: (Annex XIII of Regulation (EC) no. 1907/2006:) 12.5 Does not contain substances that fulfil the PBT/vPvB criteria. ENDOCRINE DISRUPTING PROPERTIES: 12.6 This product does not contain substances with endocrine disrupting properties identified or under evaluation.

12.7 OTHER ADVERSE EFFECTS: - Ozone depletion potential: Not available. - Photochemical ozone creation potential: Not available.

- Earth global warming potential: In case of fire or incineration liberates CO2.
